The DAR Genealogy Preservation Committee was established by the Executive Committee in 2003 as a special committee. The goal was to index DAR genealogical, organizational, and membership information into computerized, searchable databases. This work not only assists in preserving these valuable records, but also significantly enhances the application approval and membership record retrieval processes. The Chapter Caption Project, Pension Card Indexing and Real Daughter Projects have been completed while Committee's Descendants Project and Supporting Documentation Project are finishing and only require a small number of volunteers at this time.

The National Committee has been retained and other projects are being discussed. Please watch the CyberSunflower for details as soon as the new project is announced.

If you are interested in doing some online volunteer work the Patriot's Records Project is similar. That project lets you truly delve in to history as you index documents from Revolutionary times. It is a satisfying online project that you can work on from your own computer.
